Education

Bachelor's Degree in Information Technology and Software

Delta Technology University — IT Software Major

Sept 2022 – June 2026

Egypt

Graduation: June 2026

Academic Excellence: Distinction / Excellent grades during the first three academic years.

Professional Profile

Full-Stack Web Developer and Cybersecurity Specialist with professional experience developing and delivering web applications using **JavaScript, React.js, and Node.js**. Experienced in frontend and backend development, API integration, application testing, Git/GitHub workflows, and end-to-end project delivery.

Hands-on experience working on projects for US-based and international clients across education, transportation, logistics, business services, and emergency-response applications. Strong cybersecurity background in web application security, vulnerability assessment, network security, and secure development practices.

Professional Experience

Web Developer & Cybersecurity Specialist

North Shore Digital LLC — Remote US-based Projects

Jan 2026 – May 2026

- Developed and delivered full-stack web applications using **JavaScript, React.js, and Node.js**, contributing to both frontend and backend development.
- Worked across frontend development, backend development, API integration, application testing, troubleshooting, and final delivery.
- Developed and contributed to projects for US-based and international clients across education, transportation, logistics, business services, and emergency-response applications.
- Performed web application security testing and vulnerability assessment using **Burp Suite, OWASP ZAP, Nmap, and SQLMap**.
- Developed and contributed to a **GitHub-integrated code analysis application** designed to analyze uploaded code changes before merging into the main branch.
- Collaborated remotely with the development team to implement requirements, troubleshoot issues, and deliver completed projects.

Selected Projects

Islamic Center of the Twin Ports (ICTP)

- Developed the website from the ground up, working across both frontend and backend development.
- Implemented website functionality, user-facing interfaces, and backend components through final project delivery.
- Performed application testing and security testing during development.

Website: <https://www.ictpmn.org/>

Afify LLC — US Client Project

- Developed a complete business website for a US-based client, contributing across frontend and backend development.
- Worked on the project from initial development through testing and final delivery.

Website: <https://www.afifyus.com/en>

StudyScope — Educational Platform

- Contributed to the development of an educational platform focused on quizzes, instant feedback, performance analytics, and adaptive learning.
- Worked on frontend development, application functionality, and backend integration through project delivery.

Website: <https://studyscope.app/>

Tawari / Tamanna Emergency Platform

- Contributed primarily to frontend development and to a significant portion of the backend implementation.
- Developed and integrated application features and contributed to the platform's user-facing experience and backend functionality.

Website: <https://www.tawariapp.com/ar>

Dakota Valley Transport — US Client Demo

- Designed and developed a complete demonstration website for a US-based agricultural transportation and logistics business.
- Implemented the frontend experience and business-oriented website structure according to project requirements.

Live Demo: <https://dakotavalleytransport.vercel.app/contact>

BMAD — GitHub Code Analysis Application *Private Project*

- Built the code-analysis application from the ground up and transformed the original workflow into a dedicated application.
- Integrated the application with **GitHub** to automatically analyze uploaded code changes before they are merged into the main branch.
- Designed the workflow to identify coding issues and potential errors during the pre-merge process, helping improve code quality and reduce problematic changes.

Encore App — Spotify Listening Statistics *Web Application*

- Contributed to a web application for analyzing and presenting Spotify listening statistics.
- Worked on application development and user-facing functionality.

Mankato Car Rental — Minnesota, USA *Web Application*

- Contributed to the development of a US-based car rental website for a client in Minnesota.
- Worked on the implementation of the web application's user-facing functionality.

Technical Skills

Web Development: React.js, JavaScript, Node.js, HTML, CSS, Full-Stack Web Development, Frontend Development, Backend Development, REST APIs, API Integration

Cybersecurity: Web Application Security, Vulnerability Assessment, Network Security, Secure Development Practices, OWASP Top 10, Basic System Hardening

Security Tools: Burp Suite, OWASP ZAP, Nmap, Wireshark, SQLMap, Metasploit (Basic), Gobuster

Programming & Scripting: JavaScript, Python, Bash, SQL

Version Control: Git, GitHub, GitHub-based Development Workflows

Networking: TCP/IP, OSI Model, VLAN Fundamentals, Routing & Switching Basics, DNS, DHCP

Operating Systems: Windows, Linux, Ubuntu, Kali Linux, Windows Server

Cloud: AWS Fundamentals, IAM Fundamentals

Security Standards: OWASP Top 10, MITRE ATT&CK (Basic), NIST Cybersecurity Framework (Basic)

Training

Cybersecurity Training — CLS Learning Solutions

- Practical training covering networking fundamentals, web application security, vulnerability assessment, and security best practices.

Cybersecurity Training Program — Smart Village, Egypt

- Practical sessions covering network security, Windows security, Linux fundamentals, and introductory security operations.

Naval Shipyard Technical Training — Alexandria Naval Shipyard

- Technical training focused on IT infrastructure, networking concepts, and industrial technology environments.
